WHY CHOOSE DUNLOP?

When it comes to flooring performance, you can rely on Dunlop Flooring. For over 50 years, we've been Australia's largest and most trusted provider of top-quality underlay for domestic and commercial floors. We have the expertise and an extensive range to create the ultimate comfort zone for you and your space.

A Dunlop Underlay will add luxury and longevity to your carpets and timber floors. We use the latest in flooring technology, delivering maximum impact absorption to ensure your floor will maintain its appearance and provide continuous comfort and support underfoot.

Choose Comfort

Improves softness of the carpet

Choose Peace & Quiet

Reduces noise transfer

Choose Warmth

Retains more heat in the winter

Choose Durability

Improves carpet appearance and retention

Lifetime Guarantee

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure. You are also entitled to have the goods repaired or replaced if they fail to be of acceptable quality, and the failure does not amount to a major failure.

1000+ STOCKISTS ALL OVER AUSTRALIA!

We're proud to have over 1,000 stockists across Australia, making it easy for you to find our products wherever you are. Use our store locator to find your closest stockist now!

UNBEATABLE SPILL & STAIN PROTECTION FOR PET PARENTS

To find out how it works, read on to next page!

SPRINGTRED PROTECT - IMPENETRABLE BARRIER FOR THE UNBEATABLE PROTECTION

Stain Prevention - Perfect for Busy Homes

Life happens — whether it's a spilled juice box, a knocked-over pet bowl, or muddy footprints from the backyard. That's why many of our carpet underlays feature a polyethylene film or coating on top, which acts as a barrier to prevent spills from soaking into the underlay or reaching the subfloor.

Moisture Barrier - Protection from the Ground Up

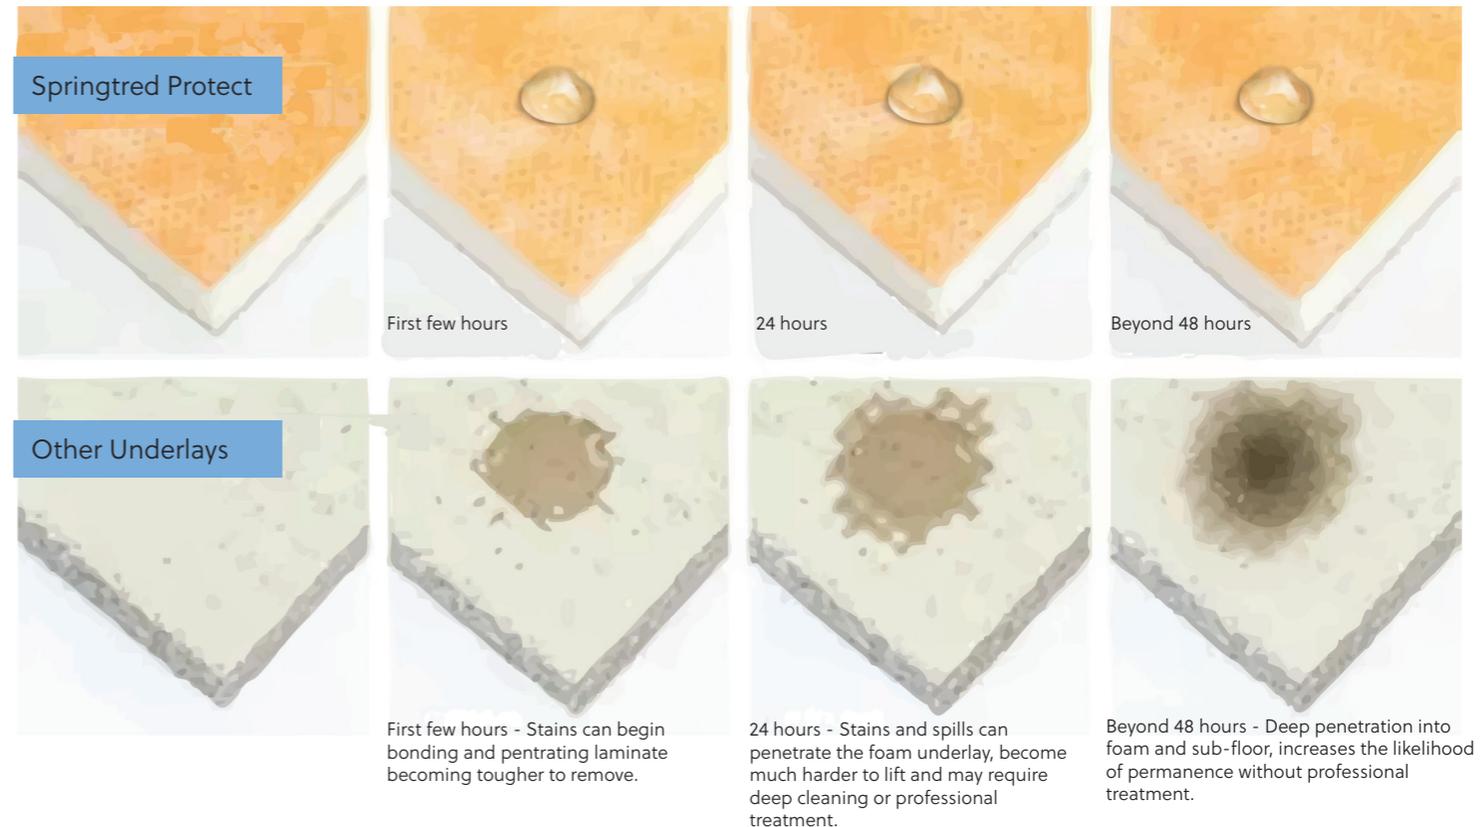

Polyethylene is a durable, high-density water-resistant plastic that doesn't absorb moisture. (It's the same type of plastic that keeps your cornflakes crunchy & now will keep your carpet clean). It serves as a protective barrier between your carpet and the subfloor — especially important if your floors are concrete. The perimeters cannot be protected due to the method of installation as per AS / NZS 2455.1:2007.

Mould and Mildew Resistance - Healthier for Your Family

Unlike natural fibres (like jute or felt), polyethylene is a synthetic, non-organic material that won't support mould or mildew growth. It's not only tough and long-lasting, but it also doesn't provide a food source for microscopic mould spores.

Why it matters: Moisture buildup is a leading cause of mould and mildew, which thrive in damp, dark places. By keeping your carpet dry underneath, polyethylene underlay helps prevent these unhealthy growths from ever starting — giving you peace of mind in busy family spaces.

Note: Information provided is a general guidance only. For best results, proper care and maintenance of underlay must be applied.

FREQUENTLY ASKED QUESTIONS

How does Underlay extend the life of my carpet?

Carpet Underlay provides a protective barrier between the floor and the carpet, essentially acting as a shock absorber from foot traffic or any other heavy impact, hence minimising the wear and tear of your carpet.

What is Dunlop Fresh Living?

A select few of our carpet underlays are treated with Dunlop Fresh Living. Dunlop Fresh Living is an anti-microbial that promotes healthier living by offering increased protection against dust mites, damaging bacteria, mould and mildew – significant triggers for asthma, hay fever and eczema. It also prevents odours and provides freshness, helping to create a healthier home environment.

Will a Dunlop underlay help make my carpet last longer?

Yes, a Dunlop underlay helps reduce the stress put on carpet by absorbing impact, which helps protect it from being crushed, matted or worn, which ultimately keeps your carpet softer and more comfortable for longer.

Why is density important?

The density represents how much foam is packed into each cubic metre of underlay. A high-value density will indicate a better quality underlay (more foam, less air!). As a rule, the higher these numbers, the more luxurious and supportive the carpet underlay will feel. The higher the density, the longer the life of the carpet.

Does underlay help with noise transfer?

An acoustic or sound rating is used to judge and limit how noise travels within an environment. A Dunlop Underlay can help reduce noise by up to 62%.

Your Dunlop underlay is graded by the AAAC (Association of Australasian Acoustical Consultants) star ratings:

★ ★ = less than 65dB

★ ★ ★ = less than 55 dB

★ ★ ★ ★ = less than 50 dB

★ ★ ★ ★ ★ = less than 45 dB

★ ★ ★ ★ ★ ★ = less than 40 dB

What is an underlay thermal rating?

Thermal insulation is measured by an 'R-value' which stands for resistance. Resistance is measured by the amount of heat that passes through a product at a particular time and thickness. The higher the R-value, the greater the insulating power. A Dunlop Underlay can act as a barrier between the subfloor and your hard flooring or carpet. A good thermal-resistant underlay will help keep your energy bills down!

HOW DO I MAINTAIN MY CARPET & UNDERLAY?

- 1. Vacuum regularly:** Vacuum your carpet at least once a week, or more frequently if you have pets or if the carpet experiences high traffic. This will help remove dirt, dust, and other debris that can accumulate on the surface of the carpet.
- 2. Clean spills immediately:** If you spill something on your carpet, clean it up immediately to prevent it from soaking into the fibres and causing a stain. Use a clean, dry cloth or paper towel to blot the spill, and avoid rubbing or scrubbing the area, as this can damage the fibres.
- 3. Use a carpet cleaner:** Invest in a good quality carpet cleaner and use it periodically to deep clean your carpet. Follow the manufacturer's instructions carefully, and ensure that the carpet is completely dry before walking on it.
- 4. Remove shoes at the door:** Shoes can track dirt and debris onto your carpet, so consider removing them at the door and encouraging guests to do the same. This can help reduce the amount of dirt and debris that accumulates on your carpet over time.
- 5. Hire a professional:** Consider hiring a professional carpet cleaning service once a year or as needed to deep clean your carpet and remove stubborn stains or odours. A professional cleaning can help extend the life of your carpet and keep it looking its best.

By following these tips, you can help keep your carpet clean and looking its best for years to come!
